

2026 Public Policy Agenda Executive Summary

The 2026 legislative session provides many opportunities to advance initiatives that will lead to greater independence for people with intellectual and other developmental disabilities (IDD).

Following is an overview of The Arc of Indiana's legislative priorities.

Support legislation to improve transparency and accountability for the state, providers, and families in the Medicaid program.

Support policies that promote appropriate services for people with medically complex conditions.

Support legislation and policy development that ensure any transition to or expansion of managed care reflects person-centered values and leads to better outcomes for people with disabilities.

Support legislation to increase protections and rights for families of children receiving special education services.

Monitor the Education Scholarship Account (ESA) Program to ensure families can navigate the program successfully and that students continue to receive needed services.

Support legislation to ensure school access to licensed or board-certified behavior analysts for students whose treatment plans include applied behavioral analysis (ABA) therapy.

Support legislation that increases employment opportunities for people with disabilities.
